Quarterly COVER report

July to September 2026

Public Health Wales

Vaccine Preventable Disease Programme

Vaccine Uptake in Children in Wales July to September 2026

COVER 160: Wales November 2026

Key points

- For children at one year of age, uptake of the "6 in 1" (three doses), MenB (two doses), rotavirus (two doses) and Pneumoccocal (two doses) vaccines all remain below 95%, at 91.1%, 93.3%, 89.5%, 91.5% respectively. Reflecting a decreasing trend over the past three years.
- Uptake of a complete three-dose course of MenB vaccine in two-year-olds was 90.5% this quarter.
- Uptake of the first dose of MMR-containing vaccine in two-year-old children was 90.8% this quarter. Uptake of the second dose of MMR-containing vaccine (MMRV) was 76.8%.
- Uptake of the fourth dose of the '6 in 1' vaccine in two-year-olds was 73.8%.
- This is the first report to present uptake of the second dose of MMR-containing vaccine (MMRV) and the fourth '6 in 1' vaccine at two years of age, following the changes to the immunisation schedule [1,2]. This is the first quarter of children who would have been due these vaccinations at 18 months of age and uptake in this first quarter of children may appear lower than in subsequent quarters.
- Uptake of the second dose of MMR in four-year-old children was 83.7%.
- The proportion of children up to date with all routine immunisations by four years of age was 82.0% this quarter and was 87.2% in five-year-olds.
- School-based vaccination sessions for teenagers have now ended for the 2025-26 academic year. Uptake of one dose of HPV vaccine in 2025-26 school year 8 children was 69.8%.
- Coverage of one dose of HPV vaccine in 2025-26 school year 9 (13–14-year-olds) was 75.2%. Coverage of one dose of HPV vaccine in 2025-26 school year 10 (14–15-year-olds) was 77.2%.
- Uptake of routine MenACWY vaccine in the 2025-26 school year 9 cohort was 70.7%. Coverage of the MenACWY vaccine in the 2025-26 school year 10 cohort was 76.4%.
- Uptake of the routine Td/IPV teenage booster in the 2025-26 school year 9 cohort was 70.9%. Coverage of the Td/IPV teenage booster in the 2025-26 school year 10 was 76.6%.
- Coverage of one dose of MMR vaccine in the 2025-26 school year 10 (age 14-15 years) was 96.1%, coverage of two doses was 93.3%.
  Coverage of one dose of MMR vaccine in the 2025-26 school year 11 (age 15-16 years) was 95.8%, coverage of two doses was 93.4%.

Background

These results are for children living in Wales in September 2026 and reaching their first, second, fourth, fifth and 16th birthdays during the quarter 01/07/2026 to 30/09/2026. Uptake of key immunisations in older children, which are mainly provided through school-based programmes in all areas other than Cardiff and Vale University Health Board, are presented in school year cohorts (children reaching their 13th, 14th, 15th and 16th birthdays between 01/09/2025 and 31/08/2026). BCG immunisation uptake data are also presented here for children vaccinated selectively following risk assessment. Coverage of neonatal hepatitis B immunisation in infants at risk is also presented, using data from the Public Health Wales Tarian case and incident management system following a move from the Public Health Wales Neonatal Hepatitis B database.

Findings

1. Uptake of all three doses of the combined "6 in 1" DTaP/IPV/Hib/HepB[1] vaccine, scheduled at two, three and four months of age, in children reaching their first birthday was 91.1% this quarter, 0.9 percentage points lower than last quarter. Uptake ranged by HB from 89.1% (Hywel Dda) to 92.8% (Betsi Cadwaladr) and by LA from 85.9% (Blaenau Gwent) to 95.6% (Ceredigion). None of the seven HBs and one of the 22 LA areas achieved the target 95% uptake (Figures 2, 3 and 6, Tables 2 and 3).
2. Uptake of primary pneumococcal conjugate vaccination (PCV) in children reaching their first birthday decreased to 91.5% this quarter, compared to 92.2% last quarter. Uptake ranged by HB from 89.7% (Hywel Dda) to 93.0% (Betsi Cadwaladr) and by LA from 87.3% (Blaenau Gwent) to 94.8% (Rhondda Cynon Taf and Wrexham). None of the seven HBs and none of the 22 LA areas achieved the target 95% uptake (Figures 2 and 3, Tables 2 and 3).
3. Uptake of two doses of MenB vaccine, scheduled at two and four months of age, in children reaching their first birthday was 93.3% this quarter. Uptake in HBs ranged from 91.1% (Hywel Dda) to 94.6% (Betsi Cadwaladr) and ranged by LA from 89.5% (Merthyr Tydfil) to 95.8% (Conwy) (Figure 3, Tables 2 and 3).
4. Uptake of two doses of rotavirus vaccine in children reaching their first birthday was 89.5% this quarter, compared to 90.6% last quarter. Uptake in HBs ranged from 87.2% (Hywel Dda) to 91.2% (Betsi Cadwaladr and Cwm Taf Morgannwg) and ranged by LA from 85.6% (Pembrokeshire) to 94.5% (Anglesey) (Figures 2 and 3, Tables 2 and 3).
5. Uptake of the first dose of MMR[2] in children reaching their second birthday (scheduled at 12 to 13 months of age) was 90.8% this quarter compared to 91.5% last quarter. Uptake ranged by HB from 88.5% (Hywel Dda) to 93.3% (Cwm Taf Morgannwg) and by LA area from 87.6% (Cardiff and Pembrokeshire) to 95.1% (Caerphilly). None of the seven HBs and one of the 22 LA areas achieved the target 95% uptake (Figures 2, 3 and 7, Tables 2 and 4).
6. Uptake of the second dose of MMR-containing vaccine (MMRV) in children reaching their second birthday (scheduled at 18 months of age) was 76.8%. Uptake ranged by HB from 71.9% (Cardiff and Vale) to 82.6% (Betsi Cadwaladr) and by LA area from 68.7% (Torfaen) to 87.7% (Wrexham) (Figure 2, Tables 2 and 4). This is the first report to present uptake of the second dose of MMR-containing vaccine (MMRV) scheduled at 18 months [1,2].
7. Uptake of the fourth dose of the '6 in 1' vaccine in children reaching their second birthday (scheduled at 18 months of age) was 73.8%. Uptake ranged by HB from 68.1% (Cardiff and Vale) to 80.4% (Betsi Cadwaladr) and by LA area from 60.4% (Torfaen) to 86.8% (Wrexham) (Figures 1 and 2, Tables 2 and 4). This is the first report to present uptake of the fourth dose of '6 in 1' vaccine scheduled at 18 months [2].
8. Uptake of the complete three dose course of MenB vaccine in children reaching their second birthday was 90.5%. Uptake ranged by HB from 87.8% (Powys Teaching) to 93.0% (Cwm Taf Morgannwg) and by LA from 86.7% (Cardiff) to 94.8% (Caerphilly). None of the seven HBs and none of the 22 LA areas achieved the target 95% uptake (Figures 2 and 3, Tables 2 and 4).

[1]DTaP/IPV/Hib/HepB vaccine protects against Diphtheria, Tetanus, Pertussis (Whooping Cough), Polio, Hib and Hep B infection.
[2]MMR protects against measles, mumps and rubella infections. From 1st January 2026, MMRV is the only MMR-containing vaccine being offered to children born from 1st January 2020.
[3] DTaP/IPV (and dTaP/IPV) vaccines boost protection against Diphtheria, Tetanus, Pertussis and Polio infection before school entry.

9. Uptake of the final dose of Pneumococcal Conjugate Vaccine (PCVf), (scheduled at 12 to 13 months of age) in children reaching their second birthday was 90.5%. Uptake ranged by HB from 88.1% (Cardiff and Vale) to 91.4% (Betsi Cadwaladr and Swansea Bay) and ranged by LA from 86.9% (Cardiff) to 94.6% (Caerphilly). None of the seven HBs and none of the LA areas achieved an uptake of 95% or over (Figure 3, Tables 2 and 4).

10. In children reaching four years of age this quarter (Table 5), uptake of:

- The "4 in 1" DTaP/IPV[3] pre-school booster was 83.3%
- The Hib/MenC booster was 93.4%.
- Two doses of MMR[2] was 83.7%

In this report, uptake of Hib/MenC booster will also include a small number of those with no recorded Hib/MenC booster but who received the additional hexavalent vaccine from 1st July 2025. The proportion of children who were up to date with all these routine immunisations at four years of age was 82.0%. This ranged by HB from 77.7% (Cardiff and Vale) to 85.9% (Powys Teaching) and by LA from 75.3% (Cardiff) to 89.4% (Gwynedd) (Figures 4 and 5, Tables 1, 2 and 5).

10. The proportion of children who were up to date with routine immunisations by their fifth birthday was 87.2%, the same as last quarter. This ranged by HB from 83.5% (Aneurin Bevan) to 91.9% (Powys Teaching) (Table 6).

11. In children reaching five years of age this quarter, coverage of one dose of MMR[2] was 95.6%. Coverage of two doses of MMR[2] was 89.3%. Coverage of two doses of MMR[2] ranged by HB from 86.3% (Aneurin Bevan) to 93.6% (Powys Teaching) and by LA from 80.6% (Torfaen) to 93.6% (Powys) (Figures 1, 2, 3 and 8, Tables 2, 6 and 7).

12. Uptake of the "4 in 1" DTaP/IPV[3] pre-school booster in children reaching their fifth birthday remained stable at 88.7% this quarter, compared to 88.8% last quarter. Uptake ranged by HB from 85.8% (Aneurin Bevan) to 92.9% (Powys Teaching) and by LA from 79.4% (Torfaen) to 92.9% (Powys). None of the seven HBs and none of the 22 LA areas achieved the 95% uptake target (Figure 3 and 9, Tables 2, 6 and 7).

13. Vaccination sessions for children in the 2025-26 school year 8 cohort (turning 13 years of age during 01/09/25 to 31/08/26) have now ended. Uptake of one dose of HPV vaccine was 69.8% (73.2% in girls and 66.6% in boys) (Tables 8a and 9).

14. Coverage of one dose of HPV vaccine in the 2025-26 school year 9 cohort was 75.2% (77.9% in girls and 72.7% in boys) (Tables 8b and 9).

15. Coverage of one dose of HPV vaccine in the 2025-26 school year 10 cohort (reaching their 15th birthday during 01/09/25 to 31/08/26) was 77.2% (79.4% in girls and 75.1% in boys) (Tables 8c and 9).

16. Uptake of the MenACWY vaccine in the 2025-26 school year 9 cohort was 70.7% (71.8% in girls and 69.6% in boys) (Tables 10a, 11 and 12).

17. Uptake of the MenACWY vaccine in the 2025-26 school year 10 cohort was 76.4% (76.9% in girls and 75.9% in boys) (Tables 10b, 11 and 13).

18. Uptake of the MenACWY vaccine in the 2025-26 school year 11 cohort was 77.0% (78.2% in girls and 76.0% in boys) (Tables 10c, 11 and 14).

19. Uptake of the Td/IPV[4] teenage booster in the 2025-26 school year 9 (children reaching 14 years of age) was 70.9%. Coverage of two doses of MMR in this year group was 93.2% and coverage

---

[2] MMR protects against measles, mumps and rubella infections. From 1st January 2026, MMRV is the only MMR-containing vaccine being offered from this point to children born from 1st January 2020.
[3] DTaP/IPV (and dTaP/IPV) vaccines boost protection against Diphtheria, Tetanus, Pertussis and Polio infection before school entry.
[4]Td/IPV boosts protection against Diphtheria, Tetanus and Polio infection before entering adulthood.

of one dose was 95.9%. Coverage of two doses of MMR vaccine ranged by HB from 90.3% (Cardiff and Vale) to 95.1% (Cwm Taf Morgannwg and Swansea Bay). Coverage of a full course of immunisation against rubella (two doses of MMR) in 14-year-old girls in this school year group was 93.2% (Table 12).

20. Coverage of the Td/IPV teenage booster in the 2025-26 school year 10 (children reaching 15 years of age) was 76.6%. Coverage ranged by HB from 70.9% (Cardiff and Vale) to 84.7% (Swansea Bay). Coverage of two doses of MMR in this year group was 93.3% and coverage of one dose was 96.1%. Coverage of two doses of MMR vaccine ranged by HB from 91.1% (Cardiff and Vale) to 95.1% (Betsi Cadwaladr). Coverage of a full course of immunisation against rubella (two doses of MMR) in 15-year-old girls in this school year group was 93.5% (Table 13).

21. Coverage of the Td/IPV teenage booster in the 2025-26 school year 11 (children reaching 16 years of age) was 77.1%. Coverage ranged by HB from 71.1% (Aneurin Bevan) to 84.6% (Swansea Bay). Coverage of two doses of MMR in this year group was 93.4% and coverage of one dose was 95.8%. Coverage of two doses of MMR vaccine ranged by HB from 90.8% (Cardiff and Vale) to 95.2% (Swansea Bay). Coverage of a full course of immunisation against rubella (two doses of MMR) in 16-year-old girls in this school year group was 93.4% (Table 14).

22. Coverage of two doses of MMR in children reaching 16 years of age this quarter (between 1st July 2026 and 30th September 2026) was 93.3%, whilst coverage of one dose of MMR was 96.0%. Coverage of a full course of immunisation against rubella (two doses of MMR) in 16-year-old girls was 93.6%. National coverage of the Td/IPV teenage booster in children reaching 16 years of age this quarter was 77.1% (Figures 1, 2 and 3, Tables 2 and 15).

23. Uptake of BCG immunisation is presented in Table 16. These data are based on BCG immunisations recorded in the National Community Child Health Database. BCG immunisation has been received by 11.0%, 11.0%, 8.8% and 7.9% of children reaching their first, second, fifth and 16th birthdays (respectively) during quarter three of 2026. This quarter, Cardiff and Vale UHB had the highest proportion of children given BCG by one year of age (22.8%), two years of age (24.3%), five years of age (20.1%) and sixteen years of age (18.4%).

24. Uptake data for hepatitis B immunisation in children who were at risk of perinatal infection, extracted from the Public Health Wales Tarian Database, are presented in Table 17. This quarter, uptake of three doses of hepatitis B vaccine at their first birthday was 100%, uptake of four doses was 90% at their second birthday, and uptake of four doses at their fifth birthday was 100%. Proportions should be interpreted with caution as small numbers of babies require an enhanced course of hepatitis B immunisation.

Comment

Uptake of immunisations in infants by their first birthday continues to show a declining trend. Uptake of the complete three-dose course of "6 in 1" vaccine was 91.1%, 0.9 percentage points lower than last quarter and the lowest uptake since 2003. None of the health boards and one local authority area achieved the target 95% uptake. Uptake of two doses of rotavirus vaccine decreased to 89.5% this quarter, compared to 90.6% last quarter, representing the lowest level of uptake observed since 2015. Uptake of PCV primary vaccination decreased to 91.5% this quarter, compared to 92.2% last quarter, falling below 95% for the fifth consecutive quarter.

Uptake of vaccinations at two years has also continued to decrease. Coverage of one dose of MMR-containing vaccine at two years decreased to 90.8%, with none of the health boards achieving the target 95% uptake. Following the changes to the childhood vaccination schedule on 1st January 2026, MMRV is now the only MMR-containing vaccine being offered to children born from 1st January 2020 [1]. Children reaching two years of age during this quarter are eligible to receive their second MMR-containing vaccine (MMRV1) and the fourth dose of the 6 in 1 vaccine at the new 18-month appointment [1,2]. Uptake of the second dose of the MMR-containing vaccine (MMRV) and fourth '6 in 1' dose by two years was 76.8% and 73.8%, respectively. These children only had six months of catch-up available before being reported on at two years of age and uptake should improve by the time this cohort begin primary school and are reported on at 4 years of age. Further information on recent changes to the childhood vaccination schedule can be found on the Public Health Wales website: https://phw.nhs.wales/knowledge-article/changes-to-the-childhood-immunisation-schedule/changes-to-the-childhood-immunisation-schedule-for-health-professionals/

The proportion of children who were up to date with their routine immunisations by four years of age decreased to 82.0% this quarter compared to 83.8% last quarter. There remains wide variation by health board. Uptake of the "4 in 1" preschool booster vaccine was the lowest of all vaccinations included in this composite measure at 83.3%. The proportion of children who were up to date with their routine immunisations by five years remained stable this quarter at 87.2%. Although there have been some quarterly fluctuations, the long-term trend in coverage of two doses of MMR by five years of age has been gradually decreasing since the first quarter of 2021. Uptake this quarter remained stable at 89.3%, compared to 89.4% last quarter.

Uptake of one dose of HPV vaccine in the 2025-26 school year 8, year 9 and 10 cohorts were 69.8%, 75.2% and 77.2%, respectively. Uptake was lower in school year 8, similar in school year 9 and higher in school year 10, compared to the equivalent groups at the same time last year (70.9%, 75.5% and 74.9%). School vaccination sessions have now concluded for the 2025-26 school year.

Uptake of MenACWY and Td/IPV remained stable in the 2025-26 school year 10 cohort compared to the previous school year 10 cohort. However, uptake is around nine percentage points lower than the 2019-20 academic year 10 group at the end of September 2020. Encouragingly, for adolescents reaching their 14th – 16th birthdays during the 2025-26 academic year, coverage of one dose of MMR exceeds 95% in most health board areas and coverage of a complete two dose course exceeds the measles and rubella elimination target of 95% in a number of health boards and local authority areas.

In 2024 there was a resurgence of measles across the UK, with 2,911 laboratory confirmed cases reported by the UKHSA, the highest recorded since 2012 [3]. This led to the WHO announcing that there was re-established transmission in the UK following three years of measles being eliminated [4]. In 2026, measles activity began to increase in February and reached its greatest level in May, but the number of cases has stabilised and decreased since then, with a total of 1,030 confirmed cases as at 15th October [3]. Three UK measles-related deaths have also been reported to date in 2026 [3].

Following an outbreak of Meningococcal Group B (MenB) in Kent in March, along with more recent smaller outbreaks in Weymouth and Reading, Welsh Government announced an urgent time-limited MenB vaccination programme starting from 20th July 2026 [5]. First doses will

continue to be available until 31st December 2026, and second doses available until 31st March 2027.

The MenB vaccination is being offered to two cohorts:

- Cohort 1: all individuals born between 01/09/2007 and 31/08/2008 (17 to 18 years old)
- Cohort 2: individuals born on or after 21/07/2001 (turning 25 on or after 21/07/2026) and are due to start undergraduate higher education OR residential further education, for the first time in autumn 2026, including international students and those from the UK Devolved Administrations and Crown Dependencies.

Uptake of the first dose of MenB vaccination in cohort one as at 26/10/2026 was 40.9%. Further data can be found on the Public Health Wales website: COVER – National childhood immunisation uptake data - Public Health Wales

Report prepared by Public Health Wales Vaccine Preventable Disease Programme and Communicable Disease Surveillance Centre.
Data for this report was provided by Digital Health Care Wales from the National Community Child Health Database (NCCHD). The data was sourced from Community Child Health databases maintained by local Child Health Office staff in Trusts throughout Wales based on regular returns from nurses and doctors who immunise or advise on immunisation. Uptake data presented throughout are for HB resident population, not for HB GP practice populations. The maps, graphs, tables 1 and 2 are best viewed in colour.

[1] Uptake of pertussis used as proxy.
[2] Uptake of two doses of meningococcal serogroup B (MenB) vaccine, scheduled at two and four months of age.
[3] From 1st January 2026, MMRV is the only MMR-containing vaccine being offered to children born from 1st January 2020.
[4] Children receiving the final dose of PCV.
[5] Uptake of 3 doses of meningococcal serogroup B (MenB) vaccine, scheduled at two, four and 12-13 months of age.
[6] Uptake of the second dose of an MMR-containing vaccine (MMRV1), due at the new 18-month appointment.
[7] From quarter 3 2026, uptake of the fourth dose of the '6 in 1' vaccine, due at the new 18-month appointment, will be reported instead of the Hib/MenC booster vaccine.
[8] Completed "4 in 1" preschool booster, the Hib/MenC booster and second MMR dose (or MMRV if given after 1st January 2026) by four years of age.
[9] Uptake of diphtheria (reinforcing booster dose) used as proxy.

[1] From 1st January 2026, MMRV is the only MMR-containing vaccine being offered to children born from 1st January 2020.

[2] Full primary course (one dose) of pneumococcal conjugate vaccine.

[3] Final (booster) dose of pneumococcal conjugate vaccine.

[4] Uptake of three doses of meningococcal serogroup B (MenB) vaccine, scheduled at two, four and 12-13 months of age.

[5] From quarter 3 2026, uptake of the fourth dose of the '6 in 1' vaccine, due at the new 18-month appointment, will be reported instead of the Hib/MenC booster vaccine

[6] Uptake of the second dose of an MMR-containing vaccine (MMRV1), due at the new 18-month appointment.

Table 5. Vaccine uptake in children reaching their 4th birthday between 01/07/26 and 30/09/26 and resident on 30/09/26. The proportion of children who have received all of these vaccines by their 4th birthday is also presented.

[1] Final (booster) dose of pneumococcal conjugate vaccine.

[2] Uptake of Hib/MenC booster will also include those with no recorded Hib/MenC booster but received the additional hexavalent vaccine to protect against Hib from 1st July 2025.

[3] Any MMR containing vaccine. From 1st January 2026, MMRV is the only MMR-containing vaccine being offered to children born from 1st January 2020.

Table 8a. Uptake of HPV vaccine in children reaching 13 years of age between 01/09/25 and 31/08/26 (School Year 8) and resident on 30/09/26, with breakdown of coverage for sex.

[1]Data reflects immunisations given and recorded on the Public Health Wales case and incident management system (Tarian) of babies born to hepatitis B positive mothers. The first dose refers to the monovalent dose given at birth, with doses 2, 3 and 4 reflecting any Hep-B containing vaccine, given either as part of the selective hepatitis b vaccination programme or routine immunisation schedule.
